

### Supplementary Figure 7A.

Transcript length distribution for Ageing related genes and for the rest of the dataset. Ageing related genes were obtained from GenAge and Transcript Length was obtained from biomart.

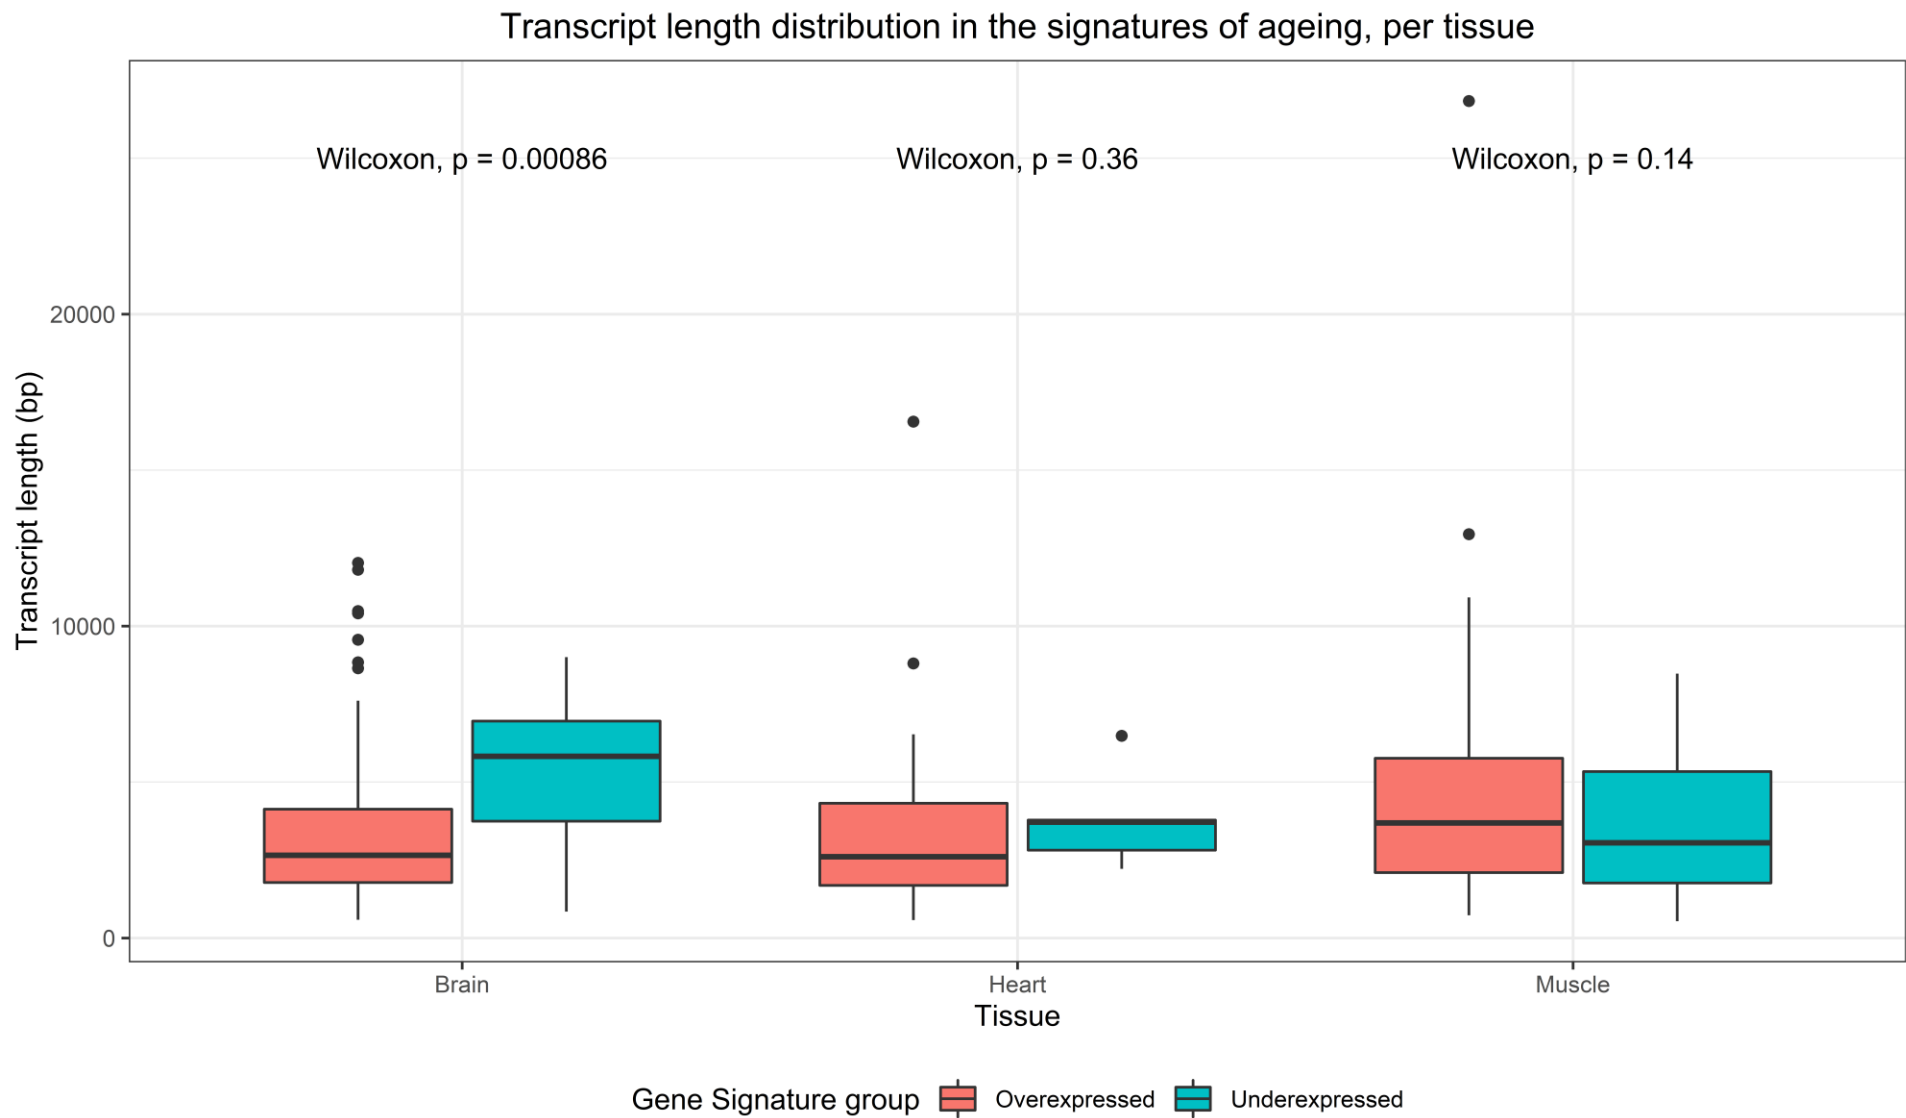

**Supplementary Figure 7B.**

Log transformed Transcript length distribution for Ageing related genes and for the rest of the dataset. Ageing related genes were obtained from GenAge and Transcript Length was obtained from biomart.

**Supplementary Figure 7C.**

Transcript length distribution for genes overexpressed and underexpressed with age.

**Supplementary Figure 7D.**

Transcript length distribution for genes overexpressed and underexpressed with age, for brain, heart and muscle.
